

GlycoStation™ Glycan Profiling Platform

System Features

- Fully-optimized Glycan Profiling System for the measurement of glycans
- Evanescent-field fluorescence excitation measurement **in a liquid phase without washing**
- Glycan Profiling System using **Lectin microarrays**
- Nano g order of glycoproteins: **High sensitive measurement**
- Cy3 labeling onto glycoproteins: **Easy labeling**
- Direct application of glycoproteins: **Easy preparation**
- Two min. scanning: **High throughput**

Applications

Application 1:

Discovery and screening of glyco-biomarkers

Application 2:

Characterization of Stem Cells

Application 3:

Infectious Ability of Viruses

Application 4:

Validation of Biosimilar Drugs

Application 5:

Intestinal Bacteria and Probiotics
